

Reliable Parts. Reliable People.

A RELIABLE PARTNER FOR MANUFACTURERS WHO NEED QUALITY PLASTIC INJECTION MOLDED PARTS

SINCE
1965

Carl Steinwall, 1965

Steinwall has been serving manufacturers of all sizes who need dependable and timely production for their tight-tolerance plastic parts. We are recognized as industry leaders for empowering reliable people with capable equipment and proven processes that consistently produce reliable parts.

Our customers trust Steinwall for expert engineering and precise production. With press capacities from 33 to 1,100 tons and the operational excellence of a highly trained engineering and production team, Steinwall is a good fit for high or low-volume production of plastic parts of all sizes. Our manufacturing and warehouse facilities in Minneapolis, Minnesota have nearly a quarter million square feet of capacity to meet the critical supply chain needs of our customers.

OUR SERVICES

ENGINEERING

- Design
- Material Selection
- Cost Optimization
- Tooling

INJECTION MOLDING

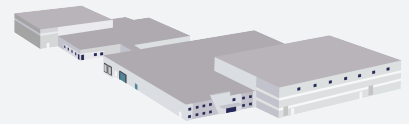

- 2-Shot/Overmolding
- Insert Molding
- Robotics/Automation
- Gas-Assist
- Utilize over 300 resins from 30 different material families.

SECONDARY OPERATIONS

- Assembly
- Sonic Welding
- Hot Stamping
- Pad Printing
- Drilling
- Taping
- Packaging

WAREHOUSE AND DISTRIBUTION

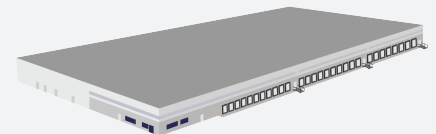

- EDI or Web Order Management
- Blanket Orders
- Just In Time systems
- Returnable Containers
- eKanban
- 45 Loading Docks

MANUFACTURING

100,000 SQ FT

1759 116th Ave. NW • Minneapolis, MN 55448

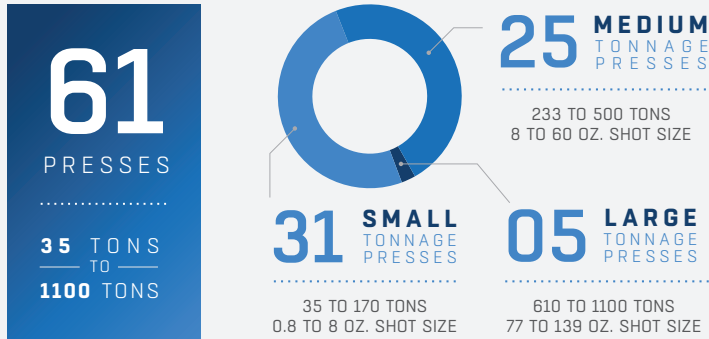

WAREHOUSE AND DISTRIBUTION

145,000 SQ FT

11225 Xeon St. NW • Minneapolis, MN 55448

OUR CAPACITY

OUR PRODUCTION

350+ RESINS

STEINWALL MANUFACTURES WITH A DIVERSE RANGE OF RESIN OPTIONS ENSURING WE HAVE THE ABILITY AND EXPERTISE TO PRODUCE PARTS TAILORED TO OUR CUSTOMERS INDIVIDUAL NEEDS.

1500+ UNIQUE PLASTICS PARTS

STEINWALL TAKES PRIDE IN PRODUCING AN EXTENSIVE ARRAY OF PRODUCTS CATERING TO A WIDE RANGE OF INDUSTRIES AND APPLICATIONS.

MATERIAL MATRIX

The Material Matrix poster is a comprehensive reference tool for Steinwall's plastic parts. It features a grid with columns for material types (e.g., Polypropylene, Nylon, Acrylic) and rows for various properties such as mechanical strength, chemical resistance, and physical characteristics. The poster is designed to be both informative and easy to navigate, providing users with a wealth of data to inform their material selection process.

Call us or visit steinwall.com to get a **FREE** copy of our interactive or laminated material matrix poster filled with useful information to aid in the development of plastic injection molded parts.

OUR RECOGNITION

- Woman Owned Business Awards
- Industry Recognition Awards
- Customer Appreciation Awards
- Certified ISO 9001:2015 Company, ANAB: ANSI-ASQ
- Nationally Accredited & UL Certified in fabricated plastic parts
